You're awesome.

You're all awesome.

What a day...

*Meghan Stapleton* <meghan\_stapleton@gov.state.ak.us> wrote:

We're working around that. Joe Balash is crafting the answers right now, Sharon will ask the questions, we will have the answers in a teleprompter, and then send those answers over the satellite tomorrow afternoon. It shouldn't take long, once we have the answers. Expect them tonight.

Thanks,  
Meg

Kari,

I need about 30 minutes of the Governor's time Wednesday morning to record an interview with Energy TV. The answers would be pre-recorded and we would feed on the satellite. Does the Governor have time Wednesday morning?

Thanks,  
meghan

Energy TV would like an interview with the Governor and I thought this Wednesday might work - the questions are below. What we need to do is simply book the Governor's time, provide the answers to the questions below, use the prompter and have her look to the side and answer the questions for use by the TV station. I just need help on the answers. It needs to be very conversationally written. Needs to be on 3:30pm Governor's feed Wednesday - could record according to Governor's schedule on Wednesday morning and would need answers by tomorrow. Possible?

Thanks,  
Meg

Energy-TV is an independently produced television program based in Calgary, Alberta, Canada. The show focuses on the energy sector, primarily oil and gas; it began broadcasting in October 2006. Energy-TV currently airs in the cities of Calgary, Edmonton, and Red Deer, Alberta; it can also be viewed on-line at [www.energy-tv.com](http://www.energy-tv.com).

As of April 7, 2007, Energy-TV will begin airing in Houston, Texas on Saturdays at 11 a.m., on ABC, with American content. On April 7th, Energy-TV will be the lead-in for the NBA play-offs. This first episode will be about natural gas; we would very much like to interview Governor Palin for this episode.

The interview could take place at the Governor's office in Washington, D.C. and we would need approximately 20 minutes of her time. Given the scheduled air date, we would like to conduct the interview by March 28th, if at all possible. The questions we propose asking are as follows:

- 1) Can you explain why your government is strongly supporting the development of the North Slope Alaska Pipeline that will carry Alaskan gas to both the U.S. and Canada? What would the economic losses be for Alaska if this project does not proceed?
- 2) How important is the Alaskan gas to the future supply equation for the U.S.?
- 3) Recently, the government of Alaska wrote into the Alaska Gasline Inducement Act, a capital investment of \$500 million, for the successful applicant or group of applicants to reach regulatory certification. What was the reason for including the monetary incentive? Has the incentive been helping in the regulatory certification process?
- 4) What progress has been made so far with the Alaska Gasline Inducement Act? How will that progress assist in the final outlook of the North Slope Alaska Pipeline?
- 5) Even if the Alaska Gasline Inducement Act proceeds, what is the overview for the project? How long would it take for regulatory completion, construction, and tie-in?

- 6) What do you see as the major stumbling blocks in pushing this project ahead?
- 7) Is your government watching the Mackenzie Valley pipeline application in Canada to see what the best strategy is in dealing with so many stakeholders? If Mackenzie gets a green light, many think that it will open the north for both Canada and the U.S., and that the Mackenzie project will become the pathway for Canadian gas in the Canadian pipeline, soon followed by a U.S. pipeline that would carry U.S. gas. Is this statement correct? Why or why not?
- 8) How would your project tie into Canadian infrastructure?
- 9) Where would the final destination be for Alaskan gas?
- 10) Is there anything else you would like to add for Energy-TV viewers?

I hope this note provides you with the information you need to respond to our request. Should you have any questions or concerns, please contact me at (403) 444- 5779 or e-mail me at [tracy@energy-tv.com](mailto:tracy@energy-tv.com).

Thank you for your time and consideration of this matter.

Best regards,  
Tracy
